

BIO BREAKDOWN

EFFORTLESSLY TURNS CONCRETE INTO SAND FOR EASY REMOVAL

PRODUCT HIGHLIGHTS

BIO BREAKDOWN is the easiest way to remove hardened concrete from trucks, forms and roadworking equipment. Just apply BIO BREAKDOWN, and within a short period of time, leftover concrete is chemically transformed into sand for easy removal.

- **Noncorrosive and biodegradeable**
- **No harsh acids**
- **No harmful fumes**
- **Removes rust**
- **Removes deposits of dried concrete effortlessly**

SAFETY PRECAUTIONS

KEEP OUT OF REACH OF CHILDREN.

Only use outdoors or in well ventilated areas indoors.
Store product in closed, properly-marked containers when not in use.

Refer to MSDS for complete safety information prior to using this or any chemical product.

Manufactured for **GOLDEN WEST INDUSTRIAL SUPPLY**

All Products 100% Made in the USA

DIRECTIONS

DILUTION:

BIO BREAKDOWN can be used full strength or diluted as much as 4:1 with water depending on the thickness of the concrete and the amount of time BIO BREAKDOWN can work before the equipment is returned to service.

SPRAY OR BRUSH ON:

Apply BIO BREAKDOWN liberally to any residual dried concrete. Let the product sit for at least 15 minutes – or longer in the case of thicker deposits. Product can be left on overnight to minimize cleanup effort. If left on overnight, re-wet surface with BIO BREAKDOWN prior to rinsing, brushing, etc.

RINSE, BRUSH OR WIPE OFF:

Once concrete has been transformed into sand, it can easily be removed by rinsing with water, pressure washing, brushing, or wiping off with a rag or towel.
