

MULTI-PURPOSE DIAMOND DEMOLITION/RESCUE BLADE

FEATURES

- An exclusive mix of industrial quality diamonds and metal powders, creating a long lasting diamond blade
- Hot pressed technology produces a consistent density of segments and rims that hold up to the toughest applications
- **Designed to cut virtually anything**

BENEFITS

- Commonly referred to as a demolition or rescue blade
- High Diamond Concentration - Allows the blade to last longer and increase efficiency
- Special Bond: Directly Sintered, Vacuum Brazed, or Laser Welded
- Tensioned and Balanced - No wobble while using blade
- Fast, clean cut
- Excellent for emergency situations
- Lasts 100 times longer than an abrasive blade

Material Usage: Concrete, Fiberglass, Masonry, Metal, Plastics, PVC
