

Fire Tiger Tooth multipurpose blade with electroplated core for cutting wood, plastic, steel, concrete, masonry and ductile pipe.

The Fire Tiger Tooth diamond blade is engineered for use by Fire Fighters, Rescue, USAR, S.W.A.T. and Police. Applications include utilization as an Emergency Rescue Blade and Tactical Entry Tool.

In time sensitive situations the Fire Tiger Tooth will provide quick and efficient cutting of a diverse range of materials such as:

- Masonry      Concrete      Roof Tile      Dry Wall      Stainless Steel
- Wood      Steel      Copper Pipe      Stucco      Tile Backer Board
- Plastic      Rebar      PVC      Aluminum      Corrugated Roofing
- Polyethylene Pipes

This includes such common items as:

- Nader Bolts
- Metal Hinges
- Acrylic
- Padlocks
- Steel Doors
- Lexan
- Hardened Stainless Shackles
- Chain Link
- Window Bar

New Vacuum Brazed Technology is the secret to the Fire Tiger Tooth's effectiveness. Diamond particles are fused directly to the steel core creating the strongest heat resistant bond available when cutting without water cooling.

Available in the most popular sizes, the Fire Tiger Tooth can be employed on hand-held grinders, circular saws, chop saws and gas cutoff saws.

Outlasting abrasive cutting discs 100 to 1, the Fire Tiger Tooth is not only time saving but a cost effective cutting solution.

As a part of the System Assessment and Validation for Emergency Responders (SAVER) Program, Texas A&M Engineering, including Texas Engineering Extension Service (TEEX) and Texas Transportation Institute (TTI), conducted a comparative assessment of multipurpose cutoff saw blades. The MK Diamond Fire Tiger Tooth blade rated highest of all blades tested.
